

1:9 Verbal Execution Plan:

My concentration at CADA is character animation. I had followed the recommended courses with emphasis in modeling, rigging and animation with a touch of texturing and lighting. I feel with the classes I have taken that I will have the skill set to do my thesis as a character animation piece. I plan on modeling and rigging as well as creating a 3D animatic over the winter break. If all goes as planned I will be able to start my animation the first week we return for the spring semester, which will give me, 2/3 of my execution to refine my animation as well as maybe having the animation blocked by the faculty review.
