Demo Reel Shot Breakdown

Cooler Door Video (12 seconds)

Company: Display Technologies

Programs: After Effects and Illustrator

Designed and animated these two video clips as part of a larger video that was displayed on a cooler door screen at a 2015 trade show.

Lip Sync/Acting, Cape Fear Dialogue Shot (9 seconds)

Programs: Maya and Photoshop

I used Animation Mentor's Bishop Rig to animate this shot working from a sound track, as well as modeled the props and textured the shot.

Body Mechanic Cat Walk (2 seconds)

Programs: Maya

I used Animation Mentor's Cat Rig to animate this walk cycle.

Animated Paul Rand's Eye-Bee-M (9 seconds)

Company: IBM

Program: After Effects

Used Paul Rand's Eye-Bee-M logo from his poster in an animation to teach my fellow IBM colleagues how to use After Effects.

Body Mechanic Jump Shot (6 seconds)

Programs: Maya and Photoshop

I used Animation Mentor's Stewie Rig to animate this shot.

Cooler Door Video (9 seconds)

Company: Display Technologies

Programs: After Effects and Illustrator

Designed and animated this video as part of a larger video that was displayed on a cooler door screen at a 2015 trade show. All the white boxes are transparent and the company's product can be viewed behind the graphics. I also created the character (named Albert Insight) originally in 2D. This was his first appearance in 3D. A co-worker did his modeling and animation.
