

2016 Demo Reel Shot Breakdown List

1. Cooler Door Video (12 seconds)

Company: Display Technologies

Programs: After Effects and Illustrator

Designed and animated this two clip video as part of a larger video that was displayed on a cooler door screen at a trade show in 2015.

2. Lip Sync / Acting, Cape Fear Dialogue Shot (9 seconds)

Programs: Maya and Photoshop

I used the Bishop Rig to animate this shot working from a sound track, as well as modeled the props and textured the shot.

3. Body Mechanic Cat Walk (2 seconds)

Programs: Maya

I used Animation Mentors Cat Rig to animate this walk cycle

4. Animated Paul Rand's Eye-Bee-M (9 seconds)

Company: IBM

Program: After Effects

Used Paul Rand's Eye-Bee-M logo from his poster in an animation to teach my fellow IBM colleagues how to use After Effects.

5. Body Mechanic Jump Shot (6 seconds)

Programs: Maya and Photoshop

I used the Stewie Rig to animate this shot

6. Cooler Door Video (9 seconds)

Company: Display Technologies

Programs: After Effects and Illustrator

Designed and animated this video as part of a larger video that was displayed on a cooler door screen at a trade show in 2015. All the white boxes show up as transparent and the product can be viewed behind the graphics. I also created the character (named Albert Insight) that I created in 2D. This was his first appearance in 3D. A co-worker did his modeling and animation.
